

# Rain Barrels

Rain barrels store rainwater where it falls and hold it to be released in drier weather. This helps water quality in our creeks by decreasing the impact of stormwater runoff and minimizing demand on our stormwater system. Barrels also **save you money** because you'll use less tap water! You can use the stored water to water gardens and lawns or to wash patio furniture and cars.

**Save & manage an important resource!**

**Join with your neighbors to improve our creeks!**

**Order your rain barrel today!**

Rain barrels from Camels Hump.  
Learn more at [camels-hump.com](http://camels-hump.com)

**Cost per barrel is \$75**

We will order your rain barrel and arrange for delivery to a convenient pick up location. We'll let you know where and when!

**Tookany/Tacony-Frankford**
