

NATIVE MEADOW INSTALLATION AREA

PLEASE KEEP OFF

In our ongoing stewardship of High School Park, the meadow will be undergoing further renovation to control the invasive weeds. There is a planned herbicide application scheduled for this Saturday, May 11th- however the rain may prevent this from happening. The following is a notification of a general timeframe for the work:

As we all know, Mother Nature is really the one in charge here, not the humans!

THIS MEADOW AREA WILL BE TREATED WITH AN HERBICIDE BETWEEN:

FRIDAY, MAY 10TH AND SATURDAY, MAY 18TH

APPLICATION WILL BE MADE AT FIRST LIGHT TO AVOID TRAFFIC IN THESE AREAS. WE WILL BE APPLYING CLEAN SLATE (EPA#228-491) TO CONTROL VARIOUS INVASIVE WEEDS. A BLUE TRACKER DYE WILL BE USED TO HELP DELINEATE THE TREATED AREAS.

PLEASE KEEP OUT OF THESE AREAS FOR 24HOURS

**SHOULD YOU HAVE ANY QUESTIONS PLEASE CONTACT
