

Dear PECO Customer:

At PECO, we are committed to providing safe and reliable energy service for our customers and the communities we serve.

We recently completed the natural gas main installation on your street, and we will now begin upgrading services outside your home. At this time, we will **not** need access to the natural gas appliances or equipment inside your home. Only necessary outside work will be completed to begin upgrading your service line. In order to complete the future work, we will contact you directly to schedule for a later date.

Any areas impacted on your property will be repaired, the streets will be repaved, and all areas will be restored to their original condition.

Henkels & McCoy, a qualified PECO contractor, has completed the new natural gas main installation on your street, and would like to start to upgrade the natural gas service outside your home.

We will work to minimize the impact this project will have on you and your neighbors, and we thank you for your cooperation. If you have any other questions about this work please call 610-832-6420 or email GasWorkInquiries@exeloncorp.com.

Sincerely,

PECO Gas Operations
